Tiles of questions	score
How to capitalize LaTeX3 sequence element in document input stream?	0
Replicate similar structured macro definitions with LaTeX3	0
Latex3: How to test if macro is empty?	0
How to index table cells?	0
FOS Open Sans font for cyrillic in latest TexLive	0
Adding numberless chapters to the table of contents with titlesec	0
How to enlarge unused space of tcolorbox interior to the bottom of a page?	0
How to replace last comma by dot after last encountered word?	0
Make text heavier using pdfrender for article thanks field and pagenumbers	0
Indentation in ntheorem with inserted picture	0
Distances in TOC entry of section with mark	0
Problem with Python 3 and Pythontex	0
Possible bug of mhchem package v4.05	0
Run pdflatex.exe from LuaLaTeX document	0
PDF as a data container	0
How to write totally expanded macro to file (with LaTeX kernel)	0
How to check if some macro defined via csname is empty?	1
Unknown errors with pax package with lualatex compiling	1
Breackable tcolorbox: wrong odd/even page recognition	1
How to put an x-coordinates of a points as extra x ticks?	1
How to draw a tangent line to a parametrically defined curve in an arbitrary point (plotted with raw gnuplot option)?	1
The error occurred after the last update	1
How to get mantissa and exponent of a number from within pgf/fpu?	1
How to replace last comma by dot in comma-separated words from datatool's database?	1

Tcbtheorem with crosslinking 1
Failure of if condition inside titlecontents 1
Automatically numbering child equations with the parental number by adding letter 1
How to compare two macros containing Cyrillic? 1
Problem with definition variable and the loops in exp3 1
Shading areas separated by the one curve in coordinate plane 1
TeX-file output another TeX-file 1
Different justification for table caption 1
Control last page filling 1
What is the suitable package to write a chemical chain reaction? 1
Patching l@part macro for TOC view 1
LuaLaTeX: How to include a generated file size in document? 2
Piecewise function for points 2
How to use csnameendcsname in LaTeX3 way? 2
Move a pgfplot's minor grid on behind the major one 2
How to print number with predefined exponent base (pgf)? 2
Placement of table in pgfplot 2
Wrapping about of a tikzpicture placed between two theorem-environments 2
How to set the same exponent of 10 in in scientific notation for column in pgfplotstable? 2
How to automatize to draw a broken line with intersections with two straight lines 2
(answer package) Preventing hyperlink to missing answer of problem 2
Batch compiling several files with Latexmk.exe 2
Draw a contour around part of modiagram 2
Drawing arrows from a plot to formula 2
Control on booktabs elements 2
Wrong intersection position between curve and vertical line 2
Tikz decoration.tex library broke my plots 2
Point on axis in pgfplots 2
mmap/cmap package does not affect on some fonts 2
Bug with XeLaTeX setmainfontCMU Serif command displaying Bold/Italic/BoldItalic fonts 2
PdfLaTeX's write into file for cyrillic with utf8 gives unwanted cyr 2
Separator between author names (with LaTeX kernel programming) 2
How to write authors of an article to the file? 2
Improper alphabetic constant error in title with greek: bug with unicode-math and hyperref in LuaLaTeX 3
Tcolorbox parbox=false option breaks by height fill option 3
Redefine title for possibility of a forced line breaking in a predefined place 3

Nonlinear transformation of tikzpicture according to a function 3
Arrow in arbitrary position on pgf/gnuplot curve 3
Shape of walking man in tikz 3
Torus with cross-section and cut 3
How to get a value returned by user defined function in expl3? 3
How to place expl3 function output to variable not in stream? 3
Calculating number of symbols in the file with expl3 3
Problem with polyglossia behaviour for LuaLaTeX 1.0.4. Possible bug? 3
Count number of lines in a file with ‘latex3‘ 3
Boron molecular orbital diagram 3
A LaTeX3 new macro/function definition problems 3
Bezier curves and centering of plot in the page 3
Why does pdflatex write to toc-file cyr-commands even with utf8 document encoding? 3
How to remove period after part number in TOC (KOMA used) 3
Texts, lines and length 3
Indentation inside tcolorbox 3
Write/Read values of the LaTeX commands (like title, author etc) in file using Lua 3
How to understand correctly scope of local variable in LaTeX3? 4
Using mathematical typesetting packages with ‘XeLaTeX‘ and ‘LuaLaTeX‘ 4
Scale factor of pgfplot’s xtick with mask 4
Unexpected behaviour of TeX condition in draw macro 4
LaTeX3 Error in MOdiagram package 4
How to create list and assign it to variable? 4
How to move tcolorbox’s boxed title to place in front of the box? 5
Marginalia inside tcolorbox 5
Tcolorbox tcbcol@back and tcbcol@frame are undefined in 4.20 5
Vertical spacing vfill inside tcolorbox 5
How to get an Integer from roman number via string variable in expl3? 5
Problem with evaluating integers with LaTeX3 with an intermediate variable 5
Cyrillic hyphenation with lualatex using luainputenc 5
Package hyperref destroy leftmark and rightmark with KOMA 5
Draw dipole field lines 5
Delimited def’s and expansion 5
Text formating depending on conditions 6
Read cell value from string array and it assign to macro 6
Roman style of an author field in biblatex’s bibstyle GOST 7
Deformation of rectangular plot 8
Table of contents with xtemplate (expl3) 9
Tikz shape as node 10
